

A REAL CONTEST

With a nice prize open to everybody.

FIRST We will give away on December 24th a new and interesting game board to every boy or girl, under twenty-one years old, who has built up, by December 1st, checking or savings account amounting to \$25.00

SECOND Every Mother and Dad whose checking account shows an average monthly balance of \$100.00 or more, for August, September, October and November may have one of these games to use or give away.

COME ON! LET'S GO! and see how many can win.

Appomattox,

Virginia.

GOAL OF RED CROSS ANNUAL ROLL CALL 5,000,000 MEMBERS

Disaster Relief and Work for Veterans Cause Heavy Drain on Resources.

In order to enable the American Red Cross to carry on its broad activities, ranging from service to the world war veterans to instant response to the great expenditures required of the Red Cross for disaster relief and work for the twenty million roll call, to be held from November 11 to 29, Armistice Day, Thanksgiving Day.

John Barton Payne, chairman of the American Red Cross at Washington, in calling upon the nation for 5,000,000 members, directs attention to the great expenditures required of the Red Cross for disaster relief and work for the twenty million roll call, to be held from November 11 to 29, Armistice Day, Thanksgiving Day.

"The Red Cross should at all times have a large reserve fund," Judge Payne stated, "because when disaster strikes, and this organization is called into instant action, there is no time to stop and raise funds. Dollars must be at hand, so we should have at all times a good reserve. We have been forced each year to draw upon our reserve, and we find that the demands are increasing annually."

Judge Payne pointed out that in the fiscal year of 1927-28, the Red Cross had expended \$16,650,000 in disaster relief work, and in the fiscal year of 1928-29, it had expended \$18,000,000 in disaster relief work, and in the fiscal year of 1929-30, it had expended \$19,000,000 in disaster relief work.

The Red Cross expenditures for disaster relief work, which ended in 1928, totaled \$16,650,000, of which approximately \$12,000,000 was expended in disaster relief work, and approximately \$4,650,000 was expended in disaster relief work. The Red Cross expenditures for disaster relief work, which ended in 1929, totaled \$18,000,000, of which approximately \$13,000,000 was expended in disaster relief work, and approximately \$5,000,000 was expended in disaster relief work.

The largest item in the annual budget of the Red Cross is for its disaster relief work, which ended in 1928, totaled \$16,650,000, of which approximately \$12,000,000 was expended in disaster relief work, and approximately \$4,650,000 was expended in disaster relief work.

Every man and woman is asked by Judge Payne to join the Red Cross during the roll call period, to aid in these humanitarian enterprises.

VETERAN RELIEF IS BIG RED CROSS TASK

Service to Disabled in Ten Years Since Armistice Has Cost \$65,800,000.

In this year of the tenth anniversary of the Armistice, which ended the world war, the American Red Cross still finds a great army of disabled and sick veterans requiring assistance, and whose families also must be aided, according to a statement by James L. Plener, vice chairman in charge of domestic operations of the Red Cross at Washington. In the ten years since November 11, 1918, the Red Cross has expended approximately \$65,800,000 in veteran relief work, Mr. Plener said. There is a daily average of 15,000 disabled and sick world war veterans enrolled in Veterans' Bureau and other government hospitals which care for these men and women, and about the same annual average of veterans ap-

uniting to wounds and illness, for those dependents the Red Cross is pledged to give required assistance. Mr. Plener pointed out.

In addition, the Red Cross, under its charter granted by Congress, has a definite duty towards service men of the regular establishment of Army, Navy and Marine Corps, and follows them to all foreign ports or duty. The expenditure in this work for the year ending June 30, 1929, was \$37,465, the largest item in the annual budget of the Red Cross.

During the year ending June 30, 1928, War Service assisted 1,000,000 in disaster relief work, and in the fiscal year of 1929-30, it had expended \$19,000,000 in disaster relief work, and in the fiscal year of 1930-31, it had expended \$20,000,000 in disaster relief work.

Ultra-violet rays are in general the most effective means of disinfecting and sterilizing. They are used in the treatment of various diseases, and in the disinfection of hospitals and public buildings. They are also used in the treatment of various diseases, and in the disinfection of hospitals and public buildings.

Ultra-Violet Rays

Soon Fade Paintings

Seranne Inn, N. Y.—Exposed paintings, and especially those which are conserved as a national treasure, should never be lighted more than is necessary, and, therefore, they should be lighted through an artificial illuminant.

This is the suggestion of J. A. MacGill, director of the National Museum, who has made an extensive study of the fading of paintings. His findings were presented in a paper, "Protection of Paintings," which was presented at the session of the International Illumination Congress held in London in 1927.

Ultra-violet rays are in general the most effective means of disinfecting and sterilizing. They are used in the treatment of various diseases, and in the disinfection of hospitals and public buildings. They are also used in the treatment of various diseases, and in the disinfection of hospitals and public buildings.

dominant cause of fading, the selection of the right color, and the elimination of these rays was urged. Because the modern paint manufacturer does not require his pigment to last more than a few years at the most, the subject of fading is of great importance. It was pointed out, if any of the present-day masterpieces are to be preserved for posterity.

Mr. Plener said that the Red Cross is not able to carry out its duties without the aid of the regular Army, Navy and Marine Corps, and follows them to all foreign ports or duty. The expenditure in this work for the year ending June 30, 1929, was \$37,465, the largest item in the annual budget of the Red Cross.

GOODYEAR'S

price often duplicated but its Quality --NEVER!

Motorists are learning that there is a big difference in tires, although they look pretty much alike. Some are long on looks and short on quality and mileage. But here is the World's Greatest Tire, and look at our prices:

HIGH PRESSURE	BALLOON
30x34 Cl. Cd., Oversize, .85 to 9.25	29x44.00..... \$10.25
31x4 SS Cord..... 14.65	29x47.5..... 12.85
32x4 SS Cord..... 15.75	30x5.00..... 14.45
32x4 1-2 SS Cord..... 20.90	31x5.25..... 15.25
	32x6.00..... 18.85

More people ride on Goodyear Tires than any other kind. You may as well have the best. They cost no more.

THURSDAY, NOV. 8, 1929.

The Result

Looking back just a little, we find the untimely quader-

ing us to who shall lead the Dem-

ocratic hosts and what the issues

should be—finally Tammany pre-

valued and brought forth Govern-

ment Smith to lead a dry America.

Smith a wet, a Catholic and a

member of Tammany Hall.

At once Bishop Cannon began to

organize the K. K. Ks, the Protestant

churches and the Republicans. With their forces

allied against the Democratic

nominee his defeat was already

accomplished.

Hoover gets 444 and Smith 87

electoral votes.

So it is, we settle down to four

more years of Coolidge and Mellon policies with the kind of

prosperity which brings the farmer

face to face with starvation.

West Virginia, Virginia, Texas,

Tennessee, North Carolina, Mis-

souri, Maryland and Kentucky

all go to the Republican column—

103 electoral votes, but these

states could not have changed

the result if Democratic

was a veritable land slide for

Hoover and a rebuke to the

Democratic party and its wet

nominee.

Appomattox County was loyal

to the party's nominee, but the

work was probably the hardest

organization ever had to do

to hold the county Democratic.

Democratic Headquarters Concede Count Shows G. O. P. Majority

REPUBLICANS SWEEP IN

Total Poll Shows 300,000 Figures—Republican Congressmen Being Carried In On Great Wave

Richmond—Breaking for the "solid South" for the first time since Reconstruction days, Virginia gave Herbert Hoover an avalanche of votes in normally Democratic counties and cities, indicating a plurality of 20,000 or more votes.

State Democratic headquarters, near the retreating, conceded Virginia to Hoover.

"The slightly more than 200 of the 1,665 precincts missing were in districts usually polling a heavy Republican vote, and R. H. Angel, chairman of the Republican State committee, predicted that the Hoover majority would reach another 5,000 with some returns.

Hoover leads 145,641 to 124,520 votes, with 1,419 of the 1,665 precincts reported. Above that already mounted to vote the totals in the Coolidge-Davis election and appeared almost certain to equal the prediction of 300,000 votes.

One Republican Congressional candidate in Virginia appeared to be in a bad way, as represented by the electoral vote, and R. H. Angel, chairman of the Republican State committee, predicted that the Hoover majority would reach another 5,000 with some returns.
